What is an agent?

An agent is "smart" software which constantly scans large amounts of data looking for information that is of specific interest to you. The agent returns this information as it is found. The result? You save time without missing any important information.

How will 'Cruiter work for me?

First, you will create a profile of the ideal candidate you're seeking. This profile includes required skills, location and experience. Then, 'Cruiter will store the profile and use it to search the current 362,474 resumes in the Resume City database and will keep you updated as new resumes are entered.
